

Emollient Soothing Vaginal Suppositories

Acts as emollient in the management of non-complicated, vaginal disease. Restores natural physiological, intra-vaginal conditions and treats vaginal dryness.

Provides a protective barrier preventing sores and cracks in vaginal mucosa that if left untreated can increase risk of yeast/bacterial infections.

Composed of a unique blend of natural ingredients to improve vaginal lubrication and ensure health of vaginal tissues.

Safety criteria

Solution formulated without parabens, perfume, phenoxyethanol, allergens, colorings.
